

Announcement of Ratch Pathana Energy Public Company Limited

No. 3/2025

Subject: Sustainable Supply Chain Management Practices

.....

Ratch Pathana Energy Public Company Limited operates in the energy sector, focusing on the producing and distributing electricity and steam. The Company is committed to enhancing energy security across the entire business supply chain—from upstream to downstream—by producing and developing clean energy, emphasizing safety and environmental friendliness. The Company also prioritizes community engagement and the creation of shared value with local communities, in alignment with the green energy concept. Supply chain management in the energy production process involves overseeing and controlling all activities related to energy production, including raw material sourcing, production, storage, transportation, and distribution. The goal is to ensure operational efficiency while minimizing environmental impact.

The company places great importance on supply chain management by establishing guidelines for working with business partners that promote the development of product and service quality and foster sustainable relationships. The Company believes that this approach will enhance competitiveness, build long-term resilience, and enable effective risk management for both the Company and its partners. The following practices are outlined:

1. Supplier Selection System: We have a supplier selection system in supply chain that conducts in compliance with the law, adheres to safety and occupational health standards, and is environmentally friendly. The suppliers are engaged based on fair competition, equality, and mutual respect, while acknowledging and managing suppliers' risks to establish appropriate actions for risk prevention and mitigation.
2. Community Engagement: We consider local suppliers as a priority to maintain and strengthen relationships within the areas where we operate.
3. Respect for Human Rights: We respect human rights and treat our suppliers and their workforce fairly, in accordance with internationally recognized standards. We foster relationships based on mutual understanding and cooperation, exchanging knowledge, collaborating on development, and enhancing the value of products and services for mutual growth.
4. Compliance with Trade Agreements: We adhere to commercial agreements and ensure the accuracy of information provided. In instances where obligations cannot be fulfilled, we engage in proactive negotiations with suppliers to jointly find solutions and prevent potential damage.
5. Confidentiality and Information Protection: We protect the confidentiality of our suppliers' sensitive information and refrain from using such information for personal gain or the benefit of any third party without proper authorization.
6. No Unwarranted Gifts or Benefits: We do not request, accept, or agree to accept assets or any benefits that fall outside of commercial agreements.

Announced on: February 6, 2025
